V SPECS

SPEC-SCIENCE-101 SEMINAR

Break down the DNA of a Specification, exploring how clauses, Divisions, and cross-references build a framework that protects liability, drives procurement, and sets measurable performance expectations.

Learn the purpose and function of Specifications within the Project Manual.

See how Specifications act as Contracts, instructions, and performance standards all at once.

Understand why poorly written or copy/paste Specs expose projects to risk, cost overruns, and disputes.

Discover how to identify key Spec clauses that determine outcomes on site.

Determine the role of 3-Part Product Master Specifications in ensuring consistency and adoption.
